## *The Healing Touch*

### *Spiritual Ministry Program*

Our educational curriculum can help you accomplish all these things while energizing your church community and providing you with a means of Community Outreach and Community Care. This education can encourage the discovery and development of spiritual gifts among your membership. It can help build a network of Pastoral Care. Our expert teachers can help you train congregational caregivers in a credentialed and credible program with written Ethics and Standards of Practice. A Healing ministry can contribute to and support church growth; it can equip, encourage and empower lay leadership; and it can augment traditional medical care. In short, it can be the answer to your prayer.

The Healing Touch spiritual Ministry program has been taught in hundreds of churches from every faith denomination all over the United States. We offer a certificate of completion as a Healing Practitioner after completing the five basic courses.

SESSION 1 = HTSM 101 & 102

### *Introduction to Healing Ministry and Judeo-Christian Anointing*

This inspiring introductory two-night, three-day retreat provides an overview of the history of healing in Christianity with the opportunity to experience the laying-on of hands. An emphasis on anointing and how it was lost in history will also be included. The roles of prayer and belief and developing a healing presence are presented along with guided meditations. Nine essential oils commonly used in the Biblical times are introduced with hands-on healing methods derived from the laying-on of hands.

SESSION 2 = HTSM 103:

### *Using your Hands to Heal*

This two-day course incorporates a variety of healing modalities that spring from the laying-on of hands found in our Christian heritage. Bio-energetic healing principles are introduced within a spiritual ministry focus. Topics include distance healing, healing of memories, meditation, working with the human energy field, and the path of the healing practitioner.

SESSION 3 = HTSM 104:

### *Forming a Healing Practice*

This two-day course presents advanced intervention methods to help with specific healing needs including intake interview, documentation of client sessions, bio-energetic assessment, back techniques, a one-hour healing session and ways to integrate this work into ministry settings. Four single essential oils are introduced with this healing work. Learning to document is important for any church setting.

SESSION 4 = HTSM 105:

### *The Art of Listening to Spiritual Guidance*

This three-day course introduces the student to awareness of Divine spiritual guidance in healing work through listening, seeing, feeling and knowing. Advanced healing is introduced as a way to do deeper spiritual healing work with others. Emphasis is on development of deeper listening, discernment of spirits and the roles of angelic helpers and the communion of saints in relation to spiritual guidance. Five essential oil blends are introduced with this healing work.

Completing the basic program, the student can apply for a Certificate of Completion as a healing practitioner. Some may feel called to finish the HTSM program by doing the Advanced Healing Practitioner Program.
